RESEARCH AND DEVELOPMENT AGENCY  
FORT BELVOIR, VIRGINIA 22060

IN REPLY REFER TO

ENGGM- SS

11 August 1965

TAT [redacted]  
I would like to bring to your attention the subject of requiring the Contact Duplicating and Reseau Printer to produce duplicates from positive and negative materials.

Reference is made to:

- TAT 1. [redacted] First Monthly Letter Report, dated 10 August 1964.  
2. [redacted] Twelfth Monthly Letter Report, dated 10 July 1965.

In reference 1, page 3, paragraph 1.5.9, the Contractor states, "Duplicating may be negative-to-positive or positive-to-negative." In reference 2, paragraph 3, the Contractor speaks of "A potential problem is the new requirement of sensing frame edges on positives rather than negatives."

TAT The above discrepancy in [redacted] design planning was brought to the attention of [redacted] personnel by the technical monitor in a telephone conversation with [redacted] during the week of 26-30 July, and to [redacted] during a conference held at GIMRADA on 5 August 1965.

TAT It is suggested that appropriate action be taken on this matter to protect the Government from a possible claim by [redacted] to the effect that the scope of the contract has been changed.

Sincerely yours

[redacted]  
Special Projects Branch  
Strategic Systems Division
